

PACIFIC DATA SYSTEMS

AUSTRALIA

AUTOMATIC WEATHER STATION

Access and Monitor Anywhere Anytime

Integrate weather knowledge into your operation to unlock efficiencies, returns, and safety gains.

An Automatic Weather Station from Pacific Data Systems Australia gives you reliable insights and the support needed to take control of your meteorological data.

Simple to use professional system that uses modern measurement techniques to give you fast and accurate updates on your weather conditions.

Benefits & Features

- Easy to access
- Seamless hosted dashboards & reports
- Intelligent alarming
- Reliable support
- Made for rugged environments
- Simple installation
- Industry approved
- Australian made

Applications

- Mining
- Government
- Construction
- Consulting
- Feedlots
- Agriculture & Aquaculture
- Research & Education
- Environmental monitoring & Regulatory compliance
- Building Management
